

AUTOMATIC CLEANING COARSE FILTER type ACF

General Technical Specs

- * back wash filter
- * mechanical cleaning system with scraper
- * max operating pressure is 6 to 10 bar
- * max operating temperature is standard 80°C
- * capacity depends on dirt load, working pressure and slot size
- * 0,1 to 5 mm baskets

Justification of Cost

- * Automatic cleaning and thus less down time
- * Low pressure drop
- * Low maintenance costs
- * Low operating costs
- * Cleaning cycle within 6 seconds

Fields of application

- * Protection of pumps against big particles
- * Protection of process equipment
- * Pre-filtration of wastewater treatment
- * Pre-filtration for fine filters
- * Granulate filtration
- * Wash installation of vegetables, potatoes and bulbs
- * Process water
- * Cooling water

Standard types

ACF-025	25 m ³ / hour capacity
ACF-060	60 m ³ / hour capacity
ACF-110	110 m ³ / hour capacity
ACF-210	210 m ³ / hour capacity
ACF-275	275 m ³ / hour capacity
ACF-600	600 m ³ / hour capacity
ACF-650	650 m ³ / hour capacity
