

ROTARY DRUM FILTER

type RDF

General Technical Specs

- * Slot sizes 0,25 to 4 mm
- * Standard configuration based upon suspended solids content of max 200 mg/l
- * Higher dirt loads upon request (and will reduce flow rate)

Justification of Cost

- * Low investment
- * Low maintenance costs
- * Low running costs
- * High flow and high dirt load

Pressurized self cleaning high dirt load required?

Please check out the high load SCF datasheet type HL-SCF

Fields of application

- * Wastewater and process water
- * Sewage treatment
- * Paper and textile industry
- * Plastic & chemical handling industry
- * Meat & vegetable processing industry
- * Animal waste and pet food industry

Standard types

RDF-110	25-110 m ³ / hour capacity
RDF-210	50-210 m ³ / hour capacity
RDF-330	75-330 m ³ / hour capacity
RDF-400	100-400 m ³ / hour capacity
RDF-560	125-560 m ³ / hour capacity
RDF-1060	150-1060 m ³ / hour capacity
RDF-1770	310-1770 m ³ / hour capacity
