

STATIC PARABOLIC SCREEN FILTER type SPS

General Technical Specs

- * Slot sizes 0,25 to 2 mm
- * Separating technique based upon peeling mechanism
- * Separating efficiency is about half the slot width
- * Screen construction in SS304

Pressurized self cleaning high dirt load required?

Please check out the high load SCF datasheet type HL-SCF

Justification of Cost

- * Short Return On Investment
- * Low maintenance costs
- * Low running costs
- * Effective technique that handles high dirt loads

Fields of application

- * Wastewater
- * Horticulture
- * Crate washers
- * Solid liquid separations of fibres, granulates, organic material etc

Standard types

SPS-025	10-25 m ³ / hour capacity
SPS-060	30-60 m ³ / hour capacity
SPS-115	65-115 m ³ / hour capacity
SPS-140	80-140 m ³ / hour capacity
SPS-170	120-170 m ³ / hour capacity
