

# REPLACING SAND FILTERS by NOSAND 3 MICRON SELF-CLEANING

## Filtration phases in this unit:

- \* Self-cleaning 50 micron filter
- \* Self-cleaning 3 micron fiber filter

## Justification of Cost

- \* No chemicals
- \* Self cleaning filtration system 24/7
- \* Low maintenance costs
- \* No process down time for self-cleaning filter
- \* Short Return On Investment
- \* Much lower site infrastructure cost when water spec does not require sand filter
- \* Compact design with large filter surface area compared to sand filter

sand filter not required?

## On-site requirements

- \* 3 bar pressure to support self-cleaning
- \* 230 V or 110 V electricity
