GLASS FABRIC CLAMP LINER +250 °C
EME-WCL2-RC

Prevents corrosion problems

Glass fabric clamp liner eliminates corrosion problems due to electrolytic action between dissimilar metals of pipe and pipe clamp.

Ease of installation
Flexible liner easy to install around the pipe.

Fields of application
• Preventign corrosion between pipe and clamp

• Protecting coating of pipe

• Isolation

Material

Glass fabrics made from texturized yarn

Finish: Silicone coating

Optional: coatings for specific applications or to prevent unraveling or to suit speciifc higher or cryogenic temperatures.

Temperature range: -30^0 C up to 250^0 C
(depending on application)

Resistant to most common oils and chemicals; please ask for details

Standard size : roll length 50 m x thickness 0.7 mm
Other sizes or thicknesses upon request

Minimum standard take-off quantity: 25 m^2
