GLASS FABRIC CLAMP LINER +1000 °C
EME-WCL2-VM

Prevents corrosion problems

Glass fabric clamp liner eliminates corrosion problems due to electrolytic action between dissimilar metals of pipe and pipe clamp.

Ease of installation

Flexible liner easy to install around the pipe.

Fields of application

• (steam) pipe and tube insulation

• insulation of equipment on ships

• insulation cladding in heating and cooling processes

Material

Silica fabrics made from texturized yarn

Finish

Vermiculite double sided

Temperature range

700^0 C up to 1000^0 C (depending on application)

Melting point: 1700^0 C

Standard size : roll length 50 m x width 0.9 m; thickness 0.7 mm

Other sizes or thicknesses upon request
